

## 10. Steep turn

To perform this manoeuvre, keep the entry speed of 92 KIAS (170 km/h IAS ) when flying solo, or 97 KIAS (180 km/h IAS) when flying dual. Enter the climb simultaneously with a bank of approximately  $45^{\circ}$ . After turning by about  $150^{\circ}$  start transition to gliding flight so that the manoeuvre will be finished in the opposite direction with the speed not decreasing below 43 KIAS (80 km/h IAS).
